**Subject:** RE: Question about drought and WQ - D-1641 & RPAs

Hi Erin,

Which water quality standards exactly? We tracked all of the D1641 standards daily until the middle of April – at which point we got too busy to maintain the spreadsheet. The Emmaton EC is tracked on our website under the TUCP, since there was a TUCP condition pertaining directly to that. I don't think that we've been maintaining a log of the rest.

It was not discussed on WOMT.

Sorry not to be more helpful.

Hi Scott, Eleanor, Kim T, Kim S, and Barb,

Are you tracking water quality monitoring from the last year and comparing it to both temporarily modified and existing requirements in D-1641 and RPAs? If so, is this something that you are able to share? I've been away from this part of my workload for months so maybe this kind of comparison already exists and is posted somewhere online. I've looked at the SWRCB drought web page and don't see this kind of comparison there but maybe I've missed it. I wouldn't know where to look on FWS and NMFS sites.

I think the data to do this are publically available and I can fetch them and do the analysis on my own. However, if any/all of you are already tracking this, and can share it with us, that would save me a lot of time and would be v. helpful to support EPA drought efforts.

Also, do you know if water quality relative to both temporarily changed and existing criteria will be reported in our upcoming season of DOSS and WOMT? It would be very helpful to have this information instead of just solely the comparison to the temporary changes. I missed this week's WOMT – was it discussed?

Anything you can share is v. appreciated!

Thanks,

Erin

Hi Karen,

Thank you so much! I am leaving tomorrow for two weeks but will catch up with Scott and Eleanor when I return. I really appreciate you connecting me to them. Thank you!

Erin

Erin,

Eleanor Bartolomeo and Scott Ligare have been tracking compliance with both sets of objectives

and are available if you have any further questions. They have been cc'd on this email.

Karen

**Subject:** Question about drought and WQ --- D-1641

Hey Karen,

I don't know if you are the right person to ask or not but you're always so informative so I thought I'd start with you. Is the state board tracking compliance with D-1641 relative to both the original objectives in D-1641 (& Bay-Delta WQCP) and the modified objectives per the temporary change order? Do you know who I might talk to about that to find out if someone is doing that?
